Shubhashish Dixit

Senior Analytics Engineer — Data Platform Architect — Analytics Engineering
12+ Years Experience • SQL • Python • dbt • Snowflake • BigQuery • Tableau • Metabase
shubhdixit91290@gmail.com | +91-8050091290 | LinkedIn | GitHub | Europe Work Authorization

PROFESSIONAL SUMMARY

➢ Senior Analytics Engineer with 12+ years of experience architecting modern data platforms, analytics engineering solutions, and executive reporting ecosystems across AI, SaaS, FinTech, Mobility, and Enterprise organisations, transforming complex data into trusted business intelligence that drives strategic decision-making.

➢ Proven technical leader with experience delivering enterprise data modernisation initiatives, mentoring engineering teams, establishing analytics engineering best practices, and partnering with Product, Engineering, and executive stakeholders to build scalable, business-critical data solutions.

PROFESSIONAL EXPERIENCE

Luggage Forward — Global Premium Luggage Logistics Platform *Aug 2024 – Oct 2025*

Analytics Engineering Consultant — Remote — Europe

- Architected modern analytics engineering workflows using dbt, designing scalable transformation layers supporting shipping, revenue, product, and operational reporting.
- Designed reusable dimensional data models and improved event instrumentation across multiple data sources, establishing a trusted analytics foundation with higher data quality and more reliable reporting.
- Delivered executive dashboards for Product, Marketing, Sales, and Customer Success leadership, enabling self-service analytics and accelerating business decision-making.

Boston Consulting Group (BCG) — Digital & Data Transformation *Jan 2023 – Jun 2024*

Senior Data Engineering Consultant — Remote — Germany

- Led enterprise-scale analytics engineering initiatives by architecting modern Snowflake and dbt data platforms, partnering with business and engineering stakeholders to deliver scalable, business-critical reporting solutions.
- Modernised legacy Qlik Compose pipelines using dbt, reducing platform costs by $100K+ annually while improving deployment reliability, maintainability, and data governance through a unified analytics architecture.
- Mentored 12+ engineers and consultants, establishing analytics engineering best practices, code quality standards, and scalable delivery processes while designing Python-based Salesforce data ingestion frameworks powering enterprise reporting in Tableau and Power BI.

ClarifAi — An Enterprise AI Platform (Pre-GPT AI Era) *Mar 2021 – Sept 2022*

Analytics Engineering Consultant — Estonia

- Architected analytics platforms for an Enterprise AI company, delivering executive reporting across AI model performance, product adoption, customer growth, and revenue while enabling data-driven decision-making across leadership teams.
- Led the migration of 100+ business-critical dashboards from Periscope to Tableau, establishing scalable self-service analytics, improved governance, and enhanced reporting performance across the organisation.
- Designed a modern Redshift analytics platform using dbt and Medallion Architecture (Bronze, Silver, Gold), integrating product, CRM, and marketing data from Segment, HubSpot, and GA4 into a unified, trusted data platform supporting enterprise-wide analytics and self-service reporting.

Zeotap GmbH — Customer Data Platform (SaaS) *Apr 2020 – Mar 2021*

Senior Product Data Analyst — Germany

- Architected scalable revenue attribution models using Python and statistical analysis, enabling accurate campaign measurement, customer intelligence, and revenue optimisation across enterprise SaaS clients.
- Partnered with Data Engineering and Product teams to improve data pipeline reliability, transformation quality, and governance, establishing trusted data foundations for product analytics and business-critical reporting.
- Designed self-service business intelligence solutions and data validation frameworks, empowering commercial, operations, and executive teams with reliable insights while improving reporting accuracy and reducing downstream data inconsistencies.

Bounce — India's Largest Scooter Sharing Platform *Jun 2019 – Apr 2020*

Lead Data Analyst — India

- Partnered with CXOs and business leaders to architect executive reporting, real-time P&L dashboards, and operational KPI frameworks, enabling data-driven decision-making across Product, Growth, Finance, and Operations.
- Designed geo-spatial fraud detection models using Python, H3, and GeoHash, reducing operational losses by approximately $120K per month while strengthening risk management and asset protection.
- Led a team of 6+ analysts to deliver large-scale customer and product analytics through A/B testing, cohort analysis, and RFM segmentation, improving marketing performance, customer retention, and operational efficiency.

NestAway - India's Largest Home Rental Platform like AirBnb *May 2016 – Feb 2019*

Founding Team – Lead Analyst — India

- Built the company's executive analytics platform from the ground up, delivering 100+ business KPIs across Growth, Revenue, Customer Experience, Operations, and Finance while enabling leadership to make data-driven strategic decisions.
- Architected automated Salesforce data pipelines and investor reporting solutions using Python, enabling near real-time business insights and supporting multiple fundraising rounds exceeding $90M.

IBM — Enterprise Technology & Consulting *Feb 2013 – Apr 2016*

Application Analyst — Apple–IBM Mobility Partnership

- Delivered enterprise mobility solutions as part of the Apple–IBM partnership, integrating data across large-scale business applications while improving application reliability, data quality, and user experience for global enterprise clients.
- Introduced IBM Cloudant NoSQL across multiple enterprise projects and collaborated with global engineering teams to design scalable cloud-native applications, laying the foundation for modern data engineering and analytics platforms.

CORE EXPERTISE

Analytics Engineering: SQL, Python, dbt, ETL/ELT, Data Modelling, Data Warehousing, Medallion Architecture
Cloud Platforms: Snowflake, BigQuery, Redshift, Azure, AWS (S3), PostgreSQL, SQL Server, MySQL
Business Intelligence: Tableau, Power BI, Looker, Omni, Metabase, Amazon QuickSight
Data Integration: Fivetran, Hevo, Stitch, Segment, GA4, Salesforce, HubSpot
Leadership: Data Platform Architecture, Technical Leadership, Stakeholder Management, Data Governance, Agile Delivery
Additional: JavaScript, LookML, ClickHouse, MongoDB, Redash, Domo, Klipfolio

PROFESSIONAL CERTIFICATIONS

Cloud: AWS Data Analytics Specialty
Professional: BCG Data & Digital Platforms Professional, Cisco Data Analytics Essentials
Analytics: HackerRank 5-Star SQL & Tableau, Google Analytics IQ
Language: IELTS

NOTABLE CLIENT ENGAGEMENTS

• Apple • Airbnb • AT&T • BCG • Coca-Cola • GreyOrange • H&M • Lyft • Maybank • McDonald's • Ogilvy • P&G • Pepsi • Quest Diagnostics

EDUCATION

Bachelor of Technology (B.Tech.): Electronics Engineering, Uttar Pradesh Technical University, Lucknow, India
Senior Secondary (CBSE): New Delhi, India
