10+ YoE • Stakeholder Management • SQL • Python • dbt • Snowflake • BigQuery • Tableau • Power BI • Metabase etc.

EXPERIENCE

Data Analytics & Data Engineering Consultant

dbLogic — Premium Analytics Consulting Platform

July 2024 – Oct 2026 | Remote, Europe

- Partnered with C-suite executives to define enterprise analytics strategy, translating business priorities into governed **data products**, executive dashboards, KPI frameworks, and semantic models that accelerated strategic decision-making, improved operational visibility, and established a trusted analytics ecosystem.
- Orchestrated enterprise analytics modernization by architecting cloud-native **data warehouses**, **lakehouse** architectures, transformation frameworks, and semantic layers using **dbt**, **SQL**, **Python**, **BigQuery**, **Snowflake**, and **Redshift**, reducing time-to-insight by over **50%** while enabling scalable self-service analytics.
- Established governed **semantic layers**, dimensional data models, metric definitions, and automated data quality frameworks, creating a single source of truth that improved metric consistency, reduced reporting discrepancies by over **60%**, and empowered self-service analytics across **Product**, **Finance**, **Marketing**, **Sales**, and **Operations**.

Senior Data Engineering Consultant

Boston Consulting Group (BCG) — Digital & Data Transformation

Jan 2023 – Jun 2024 | Europe - India

- Spearheaded enterprise analytics engineering initiatives by designing scalable **Snowflake** and **dbt** data platforms, collaborating with business leaders and engineering teams to deliver high-impact, decision-ready analytics solutions.
- Transformed legacy **Qlik Compose** ETL workflows into a modern **dbt**-based architecture, delivering **$100K+** in annual cost savings while significantly enhancing deployment efficiency, data quality, governance, and long-term platform maintainability.
- Guided and mentored a team of **12+** engineers and consultants, establishing analytics engineering standards, reusable development practices, and code quality. Architected Python-based Salesforce ingestion frameworks that enabled reliable, enterprise-scale reporting across **Tableau** and **Power BI**.

Analytics Engineering Consultant

ClarifAI — An Enterprise AI Platform (Pre-GPT AI Era)

Mar 2021 – Sept 2022 | Estonia, Europe

- Architected enterprise analytics platforms for an AI SaaS company, delivering executive dashboards across AI model performance, product adoption, customer growth, and revenue analytics, enabling leadership to reduce time-to-insight by over **60%** and accelerate strategic decision-making through trusted, near real-time business intelligence.
- Directed the migration of **100+** business-critical dashboards from Periscope to **Tableau**, reducing dashboard maintenance effort by over **50%**, improving report performance by **40%**, and establishing a governed self-service analytics ecosystem that significantly increased business adoption.
- Designed and implemented a modern **PostgreSQL** analytics platform using **dbt** and the **Medallion Architecture** (Bronze, Silver, Gold), integrating data from **Segment**, **HubSpot**, and **GA4** into a unified enterprise data platform that reduced data preparation time by over **70%**, improved data reliability, and enabled scalable self-service reporting across Product, Sales, Marketing, Finance, and Customer Success.

SKILLS

Leadership
Data Platform Architecture, Technical Leadership, Stakeholder Management, Data Governance, Agile Delivery

Data Cloud Platforms
Snowflake, BigQuery, Redshift, Azure, AWS (S3), PostgreSQL, SQL Server, MySQL

Data Engineering
SQL, Python, dbt, ETL/ELT, Data Modelling, Data Warehousing, Medallion Architecture

Data Visualization
Tableau, Power BI, Looker, Omni, Metabase, Amazon QuickSight, Superset, etc.

CRMs & Integration
Fivetran, Hevo, Stitch, Segment, GA4, Salesforce, HubSpot, Google, Meta Ads

Additional
Generative AI, ChatGPT, Claude, Gemini, JavaScript, LookML, ClickHouse, MongoDB, Redash, Zoho Analytics, Domo, Klipfolio, Sisense

STRENGTHS

- Executive Stakeholder Management
- Leadership & Mentoring
- Hustler & Leader
- Product Management & Analytics
- High Availability - 17/24
- Data Architecture
- Data Warehousing
- Cloud Analytics

Senior Product Data Analyst

Zeotap GmbH — AI-powered Customer Data Platform (SaaS)

Apr 2020 – Mar 2021 India - Germany

- Developed enterprise-scale revenue attribution models leveraging **Python, BigQuery**, statistical modelling, and advanced analytics, increasing attribution accuracy by **35%+** while enabling data-driven marketing optimization and revenue growth initiatives.
- Enhanced the reliability of enterprise analytics platforms by driving improvements in data pipelines, transformation frameworks, and governance standards, reducing production data incidents by over **50%** and improving trust in business-critical metrics.
- Delivered scalable self-service BI capabilities through **Quicksight & Redash** governed semantic models and automated data validation frameworks, cutting manual reporting effort by **60%**, improving data consistency, and accelerating insight delivery across commercial, operations, and executive leadership teams.

Lead Data Analyst

Bounce — India's Largest Scooter Sharing Platform

June 2019 – Apr 2020 Bengaluru - India

- Advised CXOs and senior business leaders in shaping enterprise reporting strategy, delivering executive P&L dashboards, real-time KPI frameworks, and performance analytics that accelerated decision-making and improved operational visibility across **Product**, **Growth**, **Finance**, and **Operations**.
- Developed geo-spatial fraud detection solutions using **Python**, **H3**, and **GeoHash**, reducing operational losses by approximately **$120K per month**, improving fraud detection accuracy, and strengthening enterprise risk management.
- Orchestrated a team of **6+** analysts to deliver advanced customer and product analytics through **Metabase**, A/B testing, cohort analysis, and RFM segmentation, increasing campaign effectiveness by over **30%**, improving customer retention, and enabling data-driven product and marketing strategies.

Senior Data Analyst

NestAway — India's Largest Home Rental Platform (same as AirBnb)

May 2016 – Mar 2019 Bengaluru - India

- Established the company's first enterprise analytics platform, delivering **100+** executive KPIs spanning **Growth**, **Revenue**, **Customer Experience**, **Operations**, and **Finance**, reducing executive reporting time by over **70%** and enabling data-driven strategic decision-making across the organization.
- Engineered scalable **Salesforce** data pipelines and automated investor reporting solutions using **Python**, enabling near real-time executive insights, eliminating hundreds of manual reporting hours annually, and supporting successful fundraising rounds totaling over **$90M**.

Senior Application Analyst

IBM — Enterprise Technology & Consulting

Feb 2013 – Apr 2016 Bengaluru - India

- Delivered enterprise mobility solutions as part of the Apple–IBM partnership, integrating data across large-scale business applications while improving application reliability, data quality, and user experience for global enterprise clients.
- Introduced IBM Cloudant NoSQL across multiple enterprise projects and collaborated with global engineering teams to design scalable cloud-native applications, laying the foundation for modern data engineering and analytics platforms.

EDUCATION

B.Tech in ECE

Uttar Pradesh Technical University

Aug 2008 – May 2012

Senior Secondary in STEM

CBSE Board, New Delhi

July 2007 – May 2008

LIFE PHILOSOPHY

"If your path has no obstacles or opposition, you're probably not heading toward anything extraordinary."

MOST PROUD OF

Core Volunteer
Shortlisted in Youth for India Programme & SayTrees Core Team Member

Courage I had
to take an asset safety sinking ship and try to make it float & save costs

Persistence & Loyalty
I showed up almost daily despite the hard moments

NestAway's Growth
from a handful of homes to a platform supporting 50K+ property listings and 150K+ tenants, driving operations, marketing, and financial data initiatives.
